Religions and Prophets

The need of religions and prophets is to guide people. Purpose in life is clarified and defined by religions and prophets. Prophets are guide and religions are roadmaps that lead one to be successful. Everyone needs direction and instructions to find a way so as to be successful in life both physically and spiritually. Next, a person cannot find the purpose in life without having prophet. God sends the prophets who tell us the ultimate purpose in life such as to worship God. God allows other religions to be corrupted because they are not for eternity and humanity. A deliberate method of God telling humanity that is not for everyone. It is for the people at that time. The Quran is unique. It came at a time and it speaks to all people. The Quran came for humanity and Annas. Lastly, the Quran has not changed. 100% PROOF THAT QURAN IS FROM GOD

The Quran is proven by many sources to be a miracle that has graced the human kind and has brought about countless blessings to people. Its eloquence, depth, and literary quality are such that even the most eloquent Arab poets and scholars of the time of the prophet Muhammad could not produce a text to match it, it is said to be unparalleled at the time. The Quran contains verses that Muslims believe predicted future events, which later came to pass. For example, the Quran predicted the victory of the Byzantine Empire over the Sassanid Empire within a few years, and this was fulfilled. Muslims believe that the Quran has been perfectly preserved, both orally and textually, without any alteration or corruption since it was revealed to the prophet Muhammad. This preservation is seen as a sign of its divine origin, as God says in the Quran that He will protect it from corruption. The teaching of the Quran is universal and timeless and has been proven again and again that it is surely a divine teaching that can be countless benefit to mankind.

100% PROOF THAT QURAN IS FROM GOD

Believers assert that the Quran is irrefutable proof of divine origin due to its remarkable consistency, linguistic excellence, and prescient insights into human embryology and cosmic phenomena. The text's intricate descriptions of embryonic development and the references to iron as "sent down" align strikingly with modern scientific understanding, which many argue could not have been known in the 7th century. Additionally, the Quran's historical narratives contain details that were unknown at the time of its revelation, further reinforcing claims of divine knowledge. Moreover, the profound emotional impact the Quran has on listeners, transcending language barriers, is often cited as evidence of its spiritual truth. For many, these elements combine to form a compelling case that the Quran is indeed the literal word of God.
